

Six Ways to Wellbeing Triangular Bunting

Each bunting triangle has a six ways icon on one side and full colour on the reverse

side. There are two bunting triangles per A4 sheet.

Simply print this file (from page 2 onwards - don't print this page) on double sided paper/vinyl and cut out the triangles using the side with the design as a guide.

If the tips of the triangles are chopped off a little when you print them, try setting the file to "fit" the page in your print popup box on your computer when you go to print it.

This file, printed double sided, from page 2 onwards, and trimmed to the triangle shapes will create 14 bunting triangles in total, 2 per WOW theme and 2 yellow WOW triangles. Just print more copies of the file for more bunting triangles.

Once you have created all your bunting triangles, you will need to attach them to a length of string, ribbon or other material to create the full section of bunting. How you connect them will depend on what materials you use to print the triangles and connect them together. Staples, glue or sewing are just a few ideas.

Be creative! See what you can create using these WOW resources.
