

### Wow Game Spinner

1. Print the WOW hexagon wheel onto a piece of paper and glue it on to a solid peice of cardboard.
2. Trim the paper and cardboard along the straight outer edges to form a strong hexagonal wheel shape.
3. Make a small hole in the centre and push a pencil through the hole with the point side facing down. The pencil will be used to spin the wheel around.
4. Wrap some blu-tack around the pencil where it meets the surface of the wheel so that the wheel doesn't slip around the pencil when it spins.
5. Spin the pencil and whichever theme lands on the flat surface is your next move.
